DETAILED ACTION

1. This office action is in response to the Board of Patent Appeals decision filed 8/2/2012 under 35 U.S.C. § 134(a) of the rejection of claims 1, 8, and 20 were reversed.
2. Claims 1-20 are pending for further examination.

Examiner's Statement of reason of Allowance

3. **Claims 1-20 are allowed.**
4. **The following is an examiner's statement of reasons for allowance:**

The present invention is directed to a method for setting up a communication between instances by protocol tester and selecting the instances and protocol layer for communication procedure.

The Prior art made record fails to anticipated or make the claimed invention. Specifically, the prior arts fail to teach, in combination with the remaining elements, a method/system for setting up a communication procedure between instance, comprising the steps of: selecting a protocol layer to be emulated by the protocol tester for testing a specified protocol layer of the item under test on the basis of the communication procedure, the protocol layer selected from a displayed list of protocol layers that are capable of being emulated by the protocol tester, the list of protocol layers including at least one layer 2 protocol from an OSI (Open Systems Interconnection) reference model; selecting abstract communication interfaces of the emulated protocol layer for the communication procedure, the abstract communication interfaces selected from a

displayed list of abstract communication interfaces associated with the selected protocol layer; selecting communication data contained in description files to be exchanged at the abstract communication interfaces; and automatically setting up through the protocol tester the communication procedure on the basis of the selections made in the above selecting steps, with parameters for the abstract communications interfaces and the communication data selecting steps being made graphically as recited, or similarly recited, in independent claims 1, 8, and 20.

The closest prior art, Gessel et al. ("Gessel," US 5,732,213), Chan et al., ("Chan," US 5,027,343), and Matsui, (US 6,560,723); Gessel discloses a method/system for of testing open systems interconnection (OSI) layers in telecommunication networks; Chan discloses a method/system for conducting test procedures between a local terminal and a remote terminal of a telecommunications system defined by a layered hierarchy of interrelated protocols, and more particularly for testing system products to verify both conformance with established standards and interoperability of the products; and Matsui discloses a method/system for providing an automatic communication protocol test system having a message/sequence edit function for executing a communication protocol testing. However, Gessel, Chan, and Matsui, singularly or in combination, still fail to anticipate or render the above cited limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
